Tran Dai Phat

AI Engineer Intern

(+84) 908647977

15/06/2005

phattrandai15062005@gmail.com

Go Vap, Ho Chi Minh City

Education

Information Technology | Artificial Intelligence

2023 - 2027

Van Lang University

- GPA: 3.29/4.0
- 50% Academic Scholarship, Academic Year 2024 - 2025
- 15% Academic Scholarship, Academic Year 2023 - 2024

Awards & Achievements

2026	Outstanding Contributor to Student Association Activities and Student Movements
2025	One of the 57 exemplary students selected for a cultural and educational exchange at the Hung Kings' Temple (Phu Tho)
2025	Exemplary Student Award, Academic Year 2024 - 2025

Career Objective

A data-driven AI Student seeking an internship in the financial domain, with a focus on applying Machine Learning to financial data. Combining a solid foundation in investment and financial markets with technical skills in data preprocessing and model training, I aim to contribute to developing reliable, high-precision AI models that support decision-making in high-stakes financial environments.

Projects

Leader (Team of 4) **01/2026 - 04/2026**

Large-Scale Text Classification System using LDA & TF-IDF on Apache Spark

Domain: NLP | Course: Tools and Platforms for AI (3 Credits) | Complexity: 9/10 | Mastery: 90% | Grade: A+

- Built a distributed PySpark pipeline combining TF-IDF and LDA to classify ~7 million text samples into 4 topics (Sports, Business, World, and Society), showcasing scalable NLP solutions beyond single-machine processing.
- Successfully deployed a real-time Streamlit app that instantly categorizes large-scale text documents on-demand, eliminating manual sorting effort — awarded A+ for scalability and real-world deployment potential.

Leader (Team of 3) **01/2026 - 04/2026**

Skin Cancer Classification using YOLOv26-cls and ResNet

Domain: Computer Vision | Course: Computer Vision (3 Credits) | Complexity: 9/10 | Mastery: 90% | Grade: A+

- Trained YOLOv26x-cls on 30,000+ images to classify BCC and Melanoma with 94% accuracy, demonstrating superior precision and inference speed compared to ResNet architectures.
- Successfully deployed an automated screening tool via Streamlit that instantly identifies skin cancer risks, reducing diagnosis wait times — awarded A+ for clinical applicability and potential for mobile deployment.

Member (Team of 3) **09/2025 - 12/2025**

Real estate recommendation system (District 1, 2, 7, Binh Thanh)

Domain: Machine Learning| Course: Artificial Intelligence and Applications (3 Credits) | Complexity: 9/10 | Mastery: 90% | Grade: A+

- Built a KNN-based recommendation system to suggest Apartments and Villas across 4 prime districts (District 1, 2, 7, and Binh Thanh), trained on 5 user preference criteria including price range, area, and legal status.
- Successfully deployed a personalized property matching web app built with Flask, HTML, CSS, and JavaScript that instantly suggests real estate fitting users' specific needs, reducing manual search time — awarded A+ for practical applicability and user-centric design.

Member (Team of 3) **09/2025 - 12/2025**

Patient Readmission Prediction System for Digestive and Circulatory Diseases

2025	University & Faculty Level "5-Good Student" Award, AY 2024 - 2025
2024	University & Faculty Level "5-Good Student" Award, AY 2023 - 2024

Soft Skills

- Time management
- Problem-solving
- Communication
- Teamwork

Hard Skills

- Language: Python
- Frameworks: Pytorch, Scikit-learn, PySpark
- AI/ML: Deep Learning, NLP, Computer Vision, LLMs
- Office: MS Word, MS Excel

Interests

- Play Chess
- Play and Watch football
- Play Guitar
- Travel

References

- Name: Nguyen Doan Thuc
- Company: MentorPlus
- Relationship: Mentor
- Phone: (+84) 908457213

Domain: Machine Learning| Course: Machine Learning (3 Credits) | Complexity: 9/10 | Mastery: 90% | Grade: A+

- Developed a Random Forest model to predict readmission probabilities across ~30 digestive and circulatory conditions, incorporating 15 comorbidity features on a dataset of ~700 patient records, achieving 82% accuracy.
- Successfully deployed a clinical risk assessment web app built with Flask, HTML, CSS, and JavaScript that outputs condition-specific readmission percentages, supporting healthcare providers in prioritizing post-discharge care — awarded A+ for rigorous methodology and clinical decision support value.

Leadership & Volunteer Experience

Van Lang University Chess Club **08/2024 - now**

President (07/2025 - Present) | Vice President (08/2024 - 07/2025)

- Led a 60-member Chess Club as President/Vice President across 2 academic years, achieving the "Outstanding Performance" award (AY 2024-25) through strategic operations and long-term growth initiatives.
- Organized 8 large-scale tournaments and 2 off-campus charity programs, demonstrating end-to-end event management and community engagement beyond the university.

Van Lang Students Sports Festival **02/2026 - 03/2026**

Leader - Chess Tournament

- Spearheaded the official drawing and seeding process for nearly 200 athletes with high precision and transparency.
- Managed and delegated tasks to a team of 40 volunteers, ensuring the tournament proceeded on schedule with zero operational errors.

Ho Chi Minh City Creative Youth Festival 2025 **04/2025 - 05/2025**

Volunteer

- Prepared competition materials for nearly 1,000 contestants and supported the jury board in grading projects from 40 different organizations.

SOS Children's Village Go Vap **08/2024 - 09/2024**

Volunteer Chess Instructor

- Provided chess instruction to 50 children, fostering logical thinking and a passion for the game from an early age.

Certificates

2025	Coursera - AI for Decision Makers
	Coursera - AI Workflow: Feature Engineering and Bias Detection
	Coursera - AI Workflow: AI in Production
2024	British Council - Aptis ESOL B2
